

Rechargeable Heated Eyelash Curler – A Worthy Purchase for Every Curled Lash Lover

Eyes have the power to allure. And lashes play a part in casting an enchanting glance. Since curled lashes are not natural to everyone, eyelash curlers are an everyday necessity.

Traditional eyelash curlers work great but pose a danger of ripping eyelashes if one isn't careful or new to using them. Therefore, an electrically rechargeable easy-to-use [eyelash curler](#) rolls into place.

Even as a curler, it's remarkably compact. The engineering is benevolent enough to encapsulate the stunning curling features into a design as slim as a mascara wand!

Being rechargeable, it's a purchase for a lifetime. It takes about 1 to 2 hours to charge and provide unmatched lash curls. The wand uses ABS and PC plastic, so; it's safe to touch while delivering optimal heat to keep your lashes curled perfectly.

Knowing everything about the curler isn't much good if you can't figure out how to use it. First, you need to clear out any makeup or dirt from your lashes. Apply a cleanser on a cotton pad and clean your lashes. Or, you can wash them and let them dry.

Next, push the power button. Wait until the light gets red, which indicates the curler is ready. Take the curler and brush your lashes for 4 to 5 seconds. As you brush, you will notice the lashes curling.

Once done, you'll search for the off button. Well, the curler features an automatic turn-off. So if you are running late, apply a coat of mascara and dash away!
