

KMUCLE-2000: This is the latest version of the Kad daemon. KMUCLE-2001: (v. 3.01) Kad client, using Service Provider Client library v. 3. KMUCLE-2002: KMUCLE-2000 package for win32. RAPIDSPEED Description: RapidSped is an application that provides for the download of media files from many sources in a single batch operation. RapidSped can be used to download single or multiple files from almost any torrent site, or any other service that provides media files for download. RapidSped is capable of batch downloading individual files, torrents, or even lists of torrents that contain a particular file. RapidSped is able to retrieve the torrents and files from any HTTP server that supports any of the major protocols, including HTTP, HTTPS, FTP, FTPS and BitTorrent, in the form of data URL's. kMule Portable Description: kMule Portable is a software tool which helps you download multiple types of files, in a single session, from the Kad network. This is the portable counterpart of kMule, which means you can skip the installation process, without encountering issues. You can place the program files to a portable storage unit and run the utility on any computer you have access to, by simply clicking the EXE file. Aside from that, you should know the Windows registry is not going to be affected by kMule Portable, and there will be no leftover items upon its removal. The UI is built on several tabs, which enable quick access to all the options included. Aside from that, any type of person can easily find their way around it, even those with little to no experience in the IT world. It is possible to use a powerful search function, while also inputting the format of the file you are looking for and its minimum and maximum size (expressed in MB). Results are displayed in the main window along with information such as name, size, availability, type, title, length, bit rate and codec. You can also share items from your hard drive and view statistics including total requests, popularity rank, accepted uploads and number of transferred files. In another tab, you can see number of fake files encountered, spams, active connections, last time since reset and the list goes on. Establishing priority to 70238732e0

This Java applet is designed to work as a light-weight game that enables you to test your knowledge of the 'Star Wars' movies. Star Wars Quiz contains a series of questions along with a series of movies from the original trilogy (A New Hope, The Empire Strikes Back, and Return of the Jedi) and the newest 'Star Wars' trilogy (The Phantom Menace, Attack of the Clones, and Revenge of the Sith). The user is prompted to either skip, play, or quit the application when asked to start a new game. IMPORTANT!! The Star Wars Quiz application contains a movie list that is automatically updated when the application is launched. The list contains a list of movies from each of the 3 'Star Wars' trilogies. The movies are listed in alphabetical order. This application includes a 'Quizmaster' as a backup. If you do not want to use the 'Quizmaster' and have fun by yourself, then you can disable the 'Quizmaster' by unchecking the 'Enable Quizmaster' option in the application configuration. How to Play Star Wars Quiz: The 'Star Wars Quiz' applet runs on most web browsers. First you need to sign in to a University or college website. Then you need to locate the Java applet (found under the 'Student Courses' tab). Once you have located the Java applet, select the 'Star Wars Quiz' option and wait for the application to load. After that, select the 'Start' option to begin the application. When the 'Star Wars Quiz' application is launched, you will need to answer 'YES' to the first prompt to start a new game. Once you have selected 'YES' to start a new game, you are prompted to answer the first movie from the first trilogy (A New Hope). After you answer the first movie, the application will display a list of movies from the first trilogy. Then you are prompted to answer a movie from the second trilogy (The Empire Strikes Back). You are then given a list of movies from the second trilogy. Once you select the movie from the second trilogy, you are given a list of movies from the third trilogy (Return of the Jedi). You then select a movie from the third trilogy. You are then given a list of movies from the 'Star Wars' trilogies. To play a game, simply select a movie from the first, second, or third trilogy
