I tried with the program that I got for the card that I want to work and there is no message that says that it will let me update my card. It works but I can't save stuff on the flash card. You must update or unplug your 3DS then plug it back in to have it work. You might still be able to save stuff on the flash card if you unplug and plug it back in (since there was no update save file), but I recommend just unplugging and plugging it back in the flash so you have a more reliable save on your flash d4474df7b8
