Whether you're a fan of RollerCoaster Tycoon 2 or are looking for something new, you're in the right place. I wish there was a way to even remove The park and the three frills without removing the rides. Frequently asked questions Surroundings How to play Ride Types How to cheat Game Creating Coasters As in RCT1, two different coasters for each land are on offer. In order to build a park of the size seen in this game, then RCT2 provides an excellent means of designing the variety of rides that will be available. You can ride any of the existing rides at any park and you will be able to access the 'Developer' screen - normally a screen shown when the ride is in operation and not in the maintenance mode - when looking at the ride settings for the first time. The Developer screens offer a much better tool than the 'Ride Designer' in the previous RCT for more detailed editing options. It also provides a more pleasing display. Creativity It is necessary to be creative in the way you set up your parks. For example, on some rides there is a cutaway area on the ride and this does not require you to actually be on the ride for the cutaway to happen - it can happen at any time. This means that you do not have to waste time watching the ride happen - for example, by going to the park office to see how many tickets you have for the day. There are also a number of hidden locations you can choose which allows you to add rides to your park without going to the storage garage. Ride Designer One of the most important aspects of RCT2 is the ability to create and edit your own rides. This requires you to change the code which controls the ride, and before you can do this you must set up the code and also select the drive and control equipment that the ride will use. As in RCT1, this is done by opening the control panel and typing in the information for the various parts of the ride. This information will be displayed at the bottom of the screen. It is important that your coding reflects the equipment you are using, and particularly you need to be aware that the 'control panel' is NOT the same as the 'Ride Designer' which will be discussed in the How to play section below. The 'control panel' screen changes depending on
