20:51:43 +0000 Loop through
array of objects and update values
in each object I have array of

objects which are JSON objects like below: `[{ "a": 1, "b": 2, "c": 3, "d": 4 }, { "a": 5, "b": 6, "c": 7, "d": 8 }]` I want to loop through this array and update a, b, c and d in all objects. This means, it should check for first object and update the values for this object. This should continue for second object and so on... A: Loop the array from index 0 to the end, for each index... Loop the index from the first object (current position) to the end (you can use one of

the `.pop()` and `.shift()` methods to take the object off the array and its position off the array). If it is an Object, then update the values of each property. If it is an Object, you must loop through the keys of the object, since there is no method such as `Object.keys()`. Note: All the examples are based on the assumption that the array is a reference to an Array.

```
const arr = [ { "a": 1, "b": 2, "c": 3, "d": 4 }, { "a": 5, "b": 6, "c": 7 }
```

Audi a4 quattro 4.8V aventurine.
