## What's New In?

Use the Import Markup tool in AutoCAD to import a drawing that has been marked up on paper or a PDF into a DWG file, then use the Markup Assist tool to add or remove the annotations you want. (video: 2:13 min.) New Dynamic Layout Panel: Now you can move shapes or text in your drawings without resorting to the drawing commands. Get better results when you edit them. Use Dynamic Layout to resize or rotate any shape in your drawing to get the best results. Select one or more shapes and click Dynamic Layout, then click a new position or rotation on the Dynamic Layout panel, and the selected shapes move to the new location. To return a shape to its original size or rotation, use the Smaller, Larger, or Rotation buttons on the Dynamic Layout panel to resize it, and then use the Previous/Next buttons to move it back to its original location. (video: 1:52 min.) Dynamic Edit: The Dynamic Edit panel allows you to customize the layout of a drawing or markups you've created. Use the menu options to modify any existing lines, polygons, or circle text. Use the Shapes panel to insert a new shape. Add a watermark to the drawing, and have the text automatically changed to a new text style. Add notes to your drawings, and have them automatically appear on the drawing area when you move the cursor over them. (video: 2:02 min.) Dynamic Update: Use the Dynamic Update panel to quickly update your working drawings. Use this panel to insert a new drawing, or update existing drawings with changes from your computer. (video: 2:15 min.) Video: Video: Changes in the 2018 release: Dockable Icons: Now you can keep your CAD screen clean and free from clutter. Just use the Dock option under Options. Choose what kind of dock you want, from the new Side Dock, Windows Dock, or Windows Aero Dock. You can also choose a color for the icon. This will keep your screen more organized and clear to work with. New Arrowheads: The new Arrowheads allow you to draw lines quickly and easily. You can change the length of the line and the color of the line. You can choose between the New Arrowheads and the Spring Arrowheads. Choose between the New Arrowheads or Spring Arrowheads by clicking the Arrowhead settings on
