Advanced Find And Replace Free

Advanced Find and Replace is a powerful text search and text replace tool developed to search and replace multiple lines of text in multiple files and documents. It can also be used to open Word, PowerPoint, Excel and other Office files directly into their own windows. Where Find and Replace tools are unable to find and/or replace a specific word or text, Advanced Find and Replace is able to look for substrings of text; it's also able to search and replace a line or batch of lines within a text document. Advanced Find and Replace Features: - Replace selected lines and select entire files or documents for replacement. - Find files with common extensions (.doc.docx.xls.xlsx.html.htm.asp.aspx) to open them directly into the correct applications (Outlook, Word, Excel, etc.). - Search by words, by lines, by exact words, by regular expressions, by characters, by date, by size, by name and modification date and by file content. - Search in HTML, ASP, ASPX, HTM and DOC or DOCX files. - Search in Microsoft Office files (Word, Excel, PowerPoint, etc.). - Search in text documents on Windows and at text-only Web pages. - Multi-document search in Windows Explorer. - Database search (SQL Server and MySQL). - Search and replace multiple identical words, phrases or whole lines within a file or text document. - Search and replace a line in different languages. - Replace the selected line or complete file with text from a file, command output or clipboard. - Save modified lines of text to a file, clipboard or other location (URL). - Insert line before, after or between selected lines. - Replace lines with line markers (i.e. * or #) to quickly select lines for replacement. - Replace line with line markers from within the text (i.e. * or #) to replace a range of lines. - Delete selected lines. - Deletes lines and saves them to clipboard. - Batch replace files and entire documents. - Select entire files or documents for replacement. - Delete or replace text in files or documents on Linux, FreeBSD and Mac OS X. - Search for or replace text in Windows Explorer and FTP/SFTP URLs. - Search for and replace with multiple regular expression expressions. - Search and replace by character(s) only. - Search and replace
