In a conventional coaxial jack connector, a plug includes a plurality of contacts, and the coaxial jack connector includes a socket with a plurality of through holes corresponding to the contacts. The plug is inserted into the socket so that

---

the contacts are mated with the through holes. However, the contacts of the plug are exposed from the socket when the plug is inserted into the socket, and the contacts may contact the contacts of a mating plug. Therefore, the plug may be damaged when an external force is applied to the coaxial jack connector. Therefore, a heretofore unaddressed need exists in the industry to address
