Kastor - Free Video Converter is an intuitive software application that helps you convert video files to a wide range of formats, namely AVI, 3G2, FLV, MP4, MPEG and others. It boasts a clean and straightforward layout that allows users to perform most operations with just a few clicks. You can add the video files to the list by either using the "drag and drop" support or the built-in browse button. Kastor - Free Video Converter supports batch processing, which means you can add multiple items to the list and convert them simultaneously. Thanks to its built-in player, you can listen to the songs before converting them. The application bundles several preset categories which prepare the video files for different formats, such as high-definition, Xbox, Android, iPod, iPhone and iPad. Additionally, you can extract the audio content from the video files and save it to WMV, AAC or MP3. When it comes to video settings, you can select the codec, size, aspect and bitrate, and specify the number of frames per second, as well as configure the audio parameters in terms of codec, frequency, channel and bitrate. It also keeps a log which contains information about the conversion process. During our testing we have noticed that the program carries out the conversion procedure very quickly and without errors throughout the entire process. All in all, Kastor - Free Video Converter packs a user-friendly GUI and some handy dedicated parameters for converting video files to different formats. It can be configured by all users, regardless of their experience level, and it doesn't hamper the system performance.
