Book excerpts There is a theory of money as a tool of inequality, which was originally developed as a tool for gaining benefits for those who have money and those who do not have it, various actions are used for this. Blank's theory is the main method of exploitation and averaging of money. In the last part, Blank discusses the theory that is known as the theory of money, created by Karl Marx. He describes money as a factor in an exploitative society used to manage human resources. Marx introduces two categories of money: money for goods and money as a store of value. Money on a commodity is money issued for a commodity in the form of a gold standard. Money as a means of accumulation is money realized in the form of banknotes. Banknotes are not coins, they represent a smaller amount of gold given to purchase goods or services that are paid for with money. As money for goods, money does not have a separate owner, it is an instrument of the commodity owner, who uses money as an intermediary who gives goods to the consumer or worker, receiving value, or vice versa. All money is proportionally distributed among all classes and groups of people and is used to buy or sell goods. He views money as capital that is used to purchase goods. Based on the theory of money, Blank introduced a mechanism for making a profit, which varies according to the social structure. Blank draws attention to the fact that these groups of people are the owners of money and holders of gold. The difference between the two groups is that the owners manage the money, while the holders are just the mass of tools needed for the property. Everyone knows that the most powerful holders are the owners of banks, although this statement is not entirely accurate. All their wealth consists of the accumulated money that was obtained from the property they own. Blanc also knows that most owners hold much more money in their hands than holders. Blank argues that when money is used to economically equalize disparities between classes or groups of people, it allows holders to maintain their wealth
