### Labor Scheduling Call Center For Windows

KEYMACRO - A Micro Macro Engine based on API and Win32 was created by Polish programmer Pawel Szulc, that actually brings back the 8bit performance and massive power of the 16-bit version. KeyMacro is highly compatible with classic 8-bit applications and fully supports command line arguments. First released on May 23rd, 2006, KeyMacro can be used as a keylogger, a keystroke logger and a macro recorder/editor. KEYMACRO's features include: 1) Keylogger functionality 2) Macro Recorder/Editor functionality 3) Autocorrect for autocorrect, Themes and Plugins are available and can be downloaded from KeyMacro's "Downloads" section. Easy Plugins are also available. Each Plugin is a single executable file and simply drops into your Plugins folder. KeyMacro's source code is available on the "Source Code" page. KeyMacro's built-in language interpreter provides a powerful data mining environment that can be used to analyze other source code. KeyMacro can log every single keystroke typed on your computer. It can also log your keyboard layout, Windows keystroke combinations, mouse keystrokes and mouse button presses. With the macro recorder, you can capture all keyboard and mouse actions in keystrokes and mouse button presses, and run them when you press a button or key on your keyboard. KeyMacro's built-in editor allows you to modify your recorded macros and then save them to a file. You can select a default name, the location and filename of the temporary file. The temporary file is automatically deleted after saving. KeyMacro also provides a macro search tool. You can select the source and destination files, the file type, the keystrokes to filter the results, and the language to display the results. KeyMacro supports undo/redo commands. KeyMacro supports drag and drop of files and icons, and text scrolling. KeyMacro supports the following keyboard shortcuts: I: Toggle Keylogger's focus. S: Save as default L: Load as default U: Undo last action C: Clear all macros M: Macro Recorder/Editor O: Run default macro D: Delete current keyboard layout X: Exit N: New line I: Toggle KeyLogger's focus S: Save As L: Load 1d6a3396d6
