The application is the simplest of a series of tiles-based paving design tools, created by guys at Urbanic. The program comes with a number of built-in shapes, such as cubes and cobbles. Users can, however, free-form create their own tiles and shapes, if desired. Unsurprisingly, the developer comes with a number of built-in items, such as cubes and cobbles, and the ability to change the orientation of tiles, but the program doesn't feature a robust editor with a large number of free-form shapes. A simple program with basic functionality Although it comes with basic functionality, Paving Design Expert works only with Windows and doesn't include any kind of support for other platforms. The application stands out for its compact size and a rather limited set of available shapes, but the fact remains that the utility can be a viable option for those not wanting to invest a lot of time in DIY job. Operating System: Windows Size: 12 MB Price: Free Details: The application allows users to create a variety of shapes and patterns using pavement tiles. Its design allows users to set the orientation of individual bricks, as well as their size. The program features a number of built-in shapes, such as cubes and cobbles, and allows users to free-form create their own tiles and patterns. **What's New in the?**

Paving Design Expert is a program created for enthusiasts looking to design sidewalks and streets in urban areas. The tool can be used for casual jobs or for small-scale professional jobs. Main features: • Create walkways using many tiles • Bricklike pattern tile editor • Analyze the results of paving designs • Convert tile pieces to Photoshop, BMP, or JPG files • Copy designs from other projects • Export pavements to BMP or JPG • Layout paving patterns • Tile memory improvement • Angle adjustment for tile and stone pieces • Free-form drawing for pattern tiles Paving Design Expert for Windows offers a full set of features, which are meant to ensure a high degree of customization for paved designs. The program has limited tile samples, which can be placed on a grid of any kind, along with the basic tools for creating patterns. Expressing your creativity using patterns The program's main drawback is that it offers a rather limited number of patterns, which is why more samples would have greatly enhanced the overall experience. Also, the limited number of samples might bother users looking for tile patterns with rather unusual shapes. Overall, Paving Design Expert is a solid application for anyone in need of drawing-board-type tools for paving designs. Although it may seem limited, the utility allows users a high degree of freedom by providing them the ability to create tiles and patterns from scratch. The application works as a gridded floor plan, so you can enter the footprints and use it as an inspection sheet. GDS files are included with the program and can be used by almost any 3D modeling software. VPS (Virtual Programming System) is a custom tiling layout program which uses the rapid tile laying function from the Windows Tile Laying interface to quickly draw out any size of floor plan. It also allows you to modify the layout of the floor plan and resize and move tiles around. The VPS layout tool is specially designed to work

with many tile layouts as well as grid and wall pattern layout programs. VPS will even re-align tiles for you to make quick edits and work more efficiently. This is a program to generate and/or modify floor plans in a spreadsheet. It can export floor plan data to PostScript, PDF, SVG or AutoCAD DXF format. It includes basic plotting and editing tools. The program is based on the CTP-Planner layout program which has been discontinued. Waterfall is a program that generates floor plan data in a spreadsheet format. This format can be used to generate floor plans, floor plan modifications, or other floor plan related data such as textured walls. It can import or export data in a variety of formats including PDF, SVG, and AutoCAD DXF. Export floor plans to PDF format is the ultimate task for any floor plan tool. FloorPlanTools PDF-Exporter
