Nithonat is a virtual sound module for use with your DAW. It has hundreds of drum hits in each of its 32 kits and it has a unique approach to the old-school Roland TR-606 drum machine. Nithonat Features:

Percussion Instruments: Drum kits include a variety of different drum hits, including many new Roland-exclusive sounds. You can play eight drum kits simultaneously with eight drum-heads. You can even use two drum-kits with MIDI play to control a MIDI pad.

Keyboard Instruments: The keybed is fully customizable, and you can use any virtual instrument or plugin to control it. You can control all of the parameters of the different instruments using the keyboard. Also, you can play all the instruments

through virtual instruments or plugins. Chords: A variety of over 40 chords have been modeled. You can use your favorite chords or you can make chord changes on the fly. Sequencer: Nithonat has an internal sequencer. It allows you to sequence the drums using the keyboard and it also allows you to play the instruments of the kit simultaneously. You can read the release notes [here](#). Taos Digital Music School, which has become a staple of the Denver music scene for years, is coming to a close this year. The school has offered thousands of kids — and plenty of adults — a chance to learn about music, and it has taught them the skills and helped them begin their own DIY music careers. Dan Zitt is back with 10 free tracks you can use in your next video. Get Dan Zitt's 7-day free course on YouTube! The GridMaster from Free Music Archive. Be sure to

check out the new site, Sequential TV. Here's another sequencer made by Free Music Archive's Free Music Store. No votes this week, but first-place goes to a very pretty free sequencer. This week's Sequential Puzzle is presented by Free Music Archive, which has two free sequencers available to the contest entries. In the top corner, a White label sequencer; in the bottom, a Black label sequencer. You can vote by posting a comment; the top-rated comment will be announced next week on Sequential. Here's a cool little sequencer from WildSounds Music, which also has a free sequencer in its Free Music Archive.

What's New in the Nithonat?

Nithonat is a virtual retro rhythm machine for your DAW and is a standalone product. The TR-606

inspired drum sounds are very powerful and versatile and great for all styles of music. The easy to use drum patterns, ease of editing and a great drum sequencer, and even more powerful sound set of LV2, give you all the tools you need to create your own songs. In addition, you can use the internal drum sequencer to chop drum segments together to create your own drum tracks. You can add additional low frequencies and bass drum sounds, or just insert a wide range of intuitive and fun samples into the drum loop to bring an instant sound board to your DAW.
