Fos-like immunoreactivity in the brain of the European eel *Anguilla anguilla* L. during sexual maturation. During the sexual maturation of *Anguilla anguilla*, Fos-like immunoreactivity (Fos-LI) increased in nuclei of the limbic system and in various somatic sensory and motor nuclei. Labelled neurons were detected in several regions of the telencephalon, diencephalon, midbrain and medulla

oblongata. In the telencephalon, they were particularly numerous in nucleus isthmi, periventricular and subperiventricular nuclei of the preoptic region and nucleus isthmo-opticus. In the diencephalon, labelled cells were located in the nucleus

What's New in the AutoCAD?

Markup assist, also referred to as Review Assist, helps you with scaling and aligning drawings as you draw. (video: 1:10 min.) Snap to Grid: Snap to Grid works like ordinary snapping. You can now also snap to an existing object such as a rectangle or a line, which is very useful when you have many objects in your drawing and have to work with the grid. (video: 1:35 min.) New commands for markup assist, including Review

Assist. New commands for snap to grid
Improved support for DXF files
Improved support for *.3ds and *.obj files
AutoCAD Architecture supports you to send a link to your drawing to receive a notification when you have an update. You can also integrate automatically into your own messaging platform. Remodeling support with the new BIML module
Remodeling: The new BIML module offers advanced features such as visualizing connected edges, surfaces and cross sections in color and different layers. You can also view the amount of time required to

completely remodel the drawing.

Boundary lines: Boundary lines with adjustable width or length and other properties help you track the boundary of a drawing.

Simplified symbols: Simplified symbols are more efficient and are enabled by default. This lets you quickly select the intended symbol with one click.

Ortho view enhancements: Ortho view highlights the dimensions of the current viewport, which is very useful when creating sheets.

Improved 3D view: You can now work more efficiently with the 3D view by choosing from a list of shapes.

Advanced view of blocks: You can now easily find the block that you need by displaying all objects at once.

Arc tool enhancements: Arc lines have been improved with the ability to manually and automatically create arcs, and to split arcs into two or more segments.

Airplane Tool: The Airplane Tool lets you easily find the corresponding block in the drawing while plotting to a surface.

Improved texture tools: The tool has been improved, so you can now rotate, scale and align textures and labels easily.

Shape tool enhancements: You can now use the shape tool to create

complex shapes without having to rotate or snap to an existing point. Layer management enhancements: You can select which layer is displayed by default, and which layers are hidden by default, depending on the current view. You can also hide unused layers and
