needs to take back our rights. “The unrest is coming. I can feel it. And I am not talking about a burning thirst for freedom. The fiery streaks come, the heat leads to fever, and when that happens, the unrest is coming.” Excerpt from “To Kill a Mockingbird” by Harper Lee (1956) “The symptoms are no longer ignored, and this is my answer to those who say that ‘This is not the time to fight’: For once, they are right. But they are wrong about the reason. It is not because ‘This is not the time to fight.’ It is because they think the fight has already been lost.” Excerpt from “To Kill a M

**What's New in the Advanced Replace Tools?**

Phrase finder is a real-time search and replace program that lets you search for and replace phrases in any file, web page, document or text. Phrase finder is not a data base, it is a

---

search and replace program. Extract Text from PDF Files makes it easy to extract text from any PDF file, either from the one that you're opening, or from an existing document. It lets you customize the results, so that you can control what information you extract. You can save extracted text to an easily editable text file, and use the results in other applications, like web pages, text editors, etc. Data Base Toolbar is a free file browser utility for easy file search and data base operations. The main window is split into four sections. The Top section holds the file browser window with all available files, while the Bottom section holds the selected file and the window menu. The Center section is a data base window, it can be opened with data base manager, if installed, or by the built in text editor. The Bottom section holds the tool bar window, where tools are displayed which can be selected for file

---

operations. The Default window specifies the current window size and the positions of the windows. Text Box is a powerful and free text editor for Windows. Text Box supports many text formats like HTML, XHTML, Text, HTML-like, Rich Text (RTF) and plain text. It can convert between many text formats and supports common text manipulation operations like search and replace, block selection, character, paragraph, word, line and line search and replace, right click context menu, cut, copy, paste and undo. Text Box supports a rich and powerful user interface. It supports Unicode, and you can use the backslash to enter special characters (like the double quote, curly quote, paragraph, tab, etc.) and to enter line breaks. Text Box supports Unicode under Windows 2000, Windows 98/ME and Windows NT/2000. CHM file is a text based help file format that is used to store

---

descriptions for all kinds of computer software. CHM file is sometimes confused with HTML Help (the Microsoft format) as both are text based help files, but CHM files are more compact and better suited for storing software descriptions. Super File Manager is an easy-to-use file manager which can easily help you manage your files and folders. You can organize your files and folders in a simple tree view or in the new standard Windows Explorer style. You can use it as a file manager, to browse your files and folders, to search for files and folders, to view and edit file properties and to execute file operations. With Super File Manager you can easily create or rename files and folders, view file contents and properties and easily delete files. Screen To File is an application that allows you to convert your screen shot to an image file. Screen To File is
