
Fifa 22 [April-2022]

As a result of “HyperMotion Technology,” your game-play becomes increasingly reactive and fluid, with key tactical moments playing out perfectly in real-time. All of this happens naturally while scoring, tackling and passing are modelled using the physics engine with the same performance, fluidity and accuracy of FIFA 19. FIFA 22’s new “Skill Feed” system provides a consistent and accurate aiming system for all players, which is similar to an actual football match – with strikes, headers, defensive interventions, saves and off-sides all shown on-screen. This system is available for first-person shooting and first-person passing. Key features

- Move and shoot with the ball like never before. Use every tackle, pass and even try and shoot on a pivot or between the legs, and take advantage of the new fetch camera.
- Whether it is a free kick, a corner, a penalty, or a long range shot, you will have more options at your disposal to complete difficult shots in the new Broken Ball Retargeting Technology.
