When I restart my system the it goes in to Ubuntu but when I click on the ubuntu logo it goes to my taskbar. However when I click on my taskbar the system doesn't go into Ubuntu and neither does the minimize button. Does anybody know what might be going wrong? A: Have you tried going into System Settings > Notifications? See if that has an "Autostart" tab. If it does, check if that tab is enabled. If it is not, click on "Add" to turn it on. Click "Save" to save your settings. Q: Add a parent child collection programmatically in MVC I have a product model public class Product
