Here are some tips for using Photoshop and some tutorials to get you started. **The History Panel** The History panel tracks the changes made to any image since the previous Save or the last time you used the Editor. While editing an image, you can save your progress periodically by pressing "Save" or "Save As" or simply by clicking the image in the Editor. The History panel lets you review your work and undo mistakes. To view the list of images you've previously saved, click the icon with the three dots to open the menu and select "Show History Panel." Navigate through the image's history with the arrow buttons or by pressing the up/down arrow keys, or the Page Up/Page Down keys. The order of images will be by date and time taken from the top of the panel to the bottom. Pressing a Ctrl key (Alt key on Windows) and click a image's red record icon will give you access to the image's history as well. You can click to select all the images or just the oldest one. Hold the Ctrl and Option (Alt) keys while right-clicking in the History panel to sort the list of saved images. In the next section, "What's new in Photoshop CS4?" you'll learn more about the newer History panels in Photoshop CS4. **The Layers Panel** Photoshop's layers have been important since the very beginning of the program. It's how you keep track of each pixel and how you draw it onto the canvas. The Layers panel provides a list of each individual layer, arranged from the top layer to the bottom layer on your canvas. When you first open an image, the Layers panel shows only the Background layer. To add a new layer, click the plus icon (+) or press Ctrl+Shift+N on a Mac or Ctrl+K on Windows. Use the layer's name to make the new layer easier to find. Use the tools to arrange the order of the layers, or press Ctrl+Z to return them to order. You can also drag a layer to hide it, as you would a window. You can make changes to the individual layers. You can blur, or soften, the edge of a layer, color in the layer, change its opacity, set layer masks (which control what parts of the image are visible), and easily move layers around the canvas or delete them. All layers in your image can be selected at once

Last December, President Obama was working on his State of the Union address. He wanted to go big, have a splashy image, a subject that would leave listeners shocked and awed. Obama decided to take on the daunting task of reforming the immigration system. After almost a year and a half, those plans are on hold. It's possible that Obama will try again, but many people think it's unlikely because of an unknown character: Tom Perez. Perez, Obama's former labor secretary and the current head of the Democratic National Committee, is a vocal proponent of comprehensive immigration reform. But Perez isn't just any champion of immigration. If he's confirmed as labor secretary, he would be the first Latino to hold the position. In fact, it was Perez who advocated hiring a Hispanic to lead the department. On the stump for Obama, and in interviews, he talks about immigration reform as a top issue for his party. In a recent interview with Univision, he spoke candidly about immigration reform. "I'm not going to pretend to be a skilled lawyer when it comes to this issue," he said, "but I do believe we need comprehensive immigration reform." Perez, also a U.S. Congressman, reportedly fancies the immigration reform issue for its political potential. "We need a change in the paradigm of the political establishment, where immigrant is a dirty word," he told Univision, "and it needs to be re-engineered." Perez has talked about the issue before. In 2014, he said to the New York Times: "It's time we have an American labor movement that has an advocate in the White House," he said. "You're going to see President Obama raise the issue of immigration reform in his State of the Union address this year and his visit to California in January. He's looking to get Democrats to the polls in California this year, and it's a key state. If we have an immigration bill, we can ensure that there's a labor movement that's reflective of the American people, of whom 71 percent are Hispanic." Meanwhile, the Senate minority leader, Chuck Schumer, also talked about immigration reform earlier this year. In May, Schumer said that it was "vital" that the Senate not adjourn until the immigration reform bill was passed. "Only then will the U.S. Senate be able to pass such a crucial bill with
