The Dental Hygiene Program and its Impact in Spain. In Spain, a new regulation (Royal Decree 6/2012) regarding dental hygienists was established. The aim of this document is to provide a better quality and safer work environment for dental professionals. It aims to direct the national dental hygiene in occupational health and hygiene issues. This article describes a program of the Occupational Health Department of the School of Dentistry of Murcia (Spain) regarding dental hygiene, which includes dental hygienists, secretarial personnel, and dentists. The program was developed following the recommendations of WHO and the Euromed Initiative. Currently, dental hygienists perform 80% of all dental hygiene procedures in primary care dental clinics. In the future, we expect that this percentage will increase. Our impression is that the quality of care provided will be improved by educating the dental hygienists and by their systematic participation.
