Desktop Architect is a desktop theme application that offers you a series of graphics files

that you can use to modify the Windows desktop, such as wallpaper, icon, cursors, sound events, and others. The tool is extremely simple, and it allows you to choose among various cursors, icons, sound events, and wallpaper. The latter can either be static or animated, while the former can be easily modified, such as the font

style, size, color, etc. The great thing about this application is that you can choose to apply the changes to the desktop at a user-defined time, which is set in the program itself. Desktop Architect supports both of Windows XP and Vista, and it carries out its task quickly, because no errors came up during our testing. What's more, the

tool is pretty friendly with Windows resources, so the performance of the computer was not hampered during our tests. The application is highly compatible with both 32-bit and 64-bit versions of Windows. As an added feature, this desktop theme software lets you save your project to a file for further changes and downloads.

Desktop Architect is a lightweight Windows application whose purpose is to help you personalize your desktop appearance by creating themes with customized wallpapers, screen savers, icons, cursors, sound events, and others. It sports a straightforward layout that allows you to

preview the changes applied to your desktop. Desktop Architect gives you the possibility to change the icons for different utilities by selecting from preset ones or upload a file from the computer, and choose between various cursors or add an animated or static one. What's more, you are allowed to customize the logo image

for the startup and shutdown sessions, set an image as your wallpaper, and pick the screen saver and configure its settings. Other notable characteristics worth mentioning are represented by the possibility to select the color scheme, personalize several windows in terms of size, color, and font style, invert 3D objects,

as well as tweak sound events by adding WAV files from your PC. Desktop Architect lets you save the project to a file, install or uninstall a theme, and schedule a theme at a user-defined time. Last but not last, you can make the desktop icons transparent, show or hide the wallpaper, icons, and windows, and display an

empty or full Recycle Bin. During our testing we have noticed that the tool carries out a task quickly, and no errors showed up throughout the entire process. It is quite friendly with system resources, so the overall performance of the computer is not hampered. As a conclusion, Desktop Architect offers a handy

set of parameters and a straightforward approach for helping you design desktop themes which can be applied automatically.
