#### What's New In?

With the DeskNotes program, you can create notations, memos and letters in a simple and handy way. Your precious data such as notes, calendar and memos are neatly stored on the desktop. DeskNotes supports various editing and formatting functions like bold and italic. DeskNotes Software Function: •Organize desknotes to the different folders by using the archive manager. •Share your notes with other people in your specified category •Send notes via email •An archive manager allows you to manage your notes •Synchronize your notes with an Outlook Note account First of all: Nice app. It's a little difficult to use, especially if you're not a web user. I find it easier for me to have web apps than desktop software. However, it does have nice features such as creating linked notes, sharing notes with external accounts such as facebook, Skype, etc. I also like that it works across systems as well as platforms. I like how it can be turned into a dashboard and I like how it syncs with Evernote. I'm planning on using it to help organize my studies and work better. I'm in college and I'm studying Computer Science & Electrical Engineering. I find it difficult to use it for more than 10 minutes at a time but I'll definitely be using this when I have more time. I agree with SD\_GOD that it would be much better if it were a web app. A desktop app would probably be easier to use. It's a great app, easy to use. I've created notations and reminders to help with my studying. I save them to my Outlook Note account and view them on my Blackberry with my pencil. I like how it has a simple and clean interface, but other than that it's not any different than the Windows sticky notes. You can't edit your notes from outside of the app. It's a little cumbersome, but after awhile it doesn't bug me at all. Overall it's a great app. With the feature that can be used on multiple platforms and across OS's it's a great program for your PC. I would highly recommend it to any avid PC user. Wow, this is a good software! I like the fact that this app can be accessed from my Blackberry as well as my desktop computer! I'm very satisfied with this software! There are some small bugs. Sometimes when I'm logged in with my Outlook account,
