

# HDPE PIPE FITTINGS

# What is HDPE Pipe Fitting?

HDPE stands for High-density polyethylene. It also stands for polyethylene high-density (PEHD). It is a thermoplastic polymer that is usually originated out of monomer ethylene, also known as alkenes or polythene while utilized in the best HDPE pipe fitting.

# HDPE Pipe Fitting Manufacturer

**HDPE Pipe Fitting Manufacturer** in India are the best manufacturer that offers HDPE pipes and fittings.

**Best HDPE pipes** are best for agricultural purposes such as Drip and Sprinkler Irrigation techniques, pump and passing water systems. They are even used for supplying drinking water, industrial purposes such as groundwater pipes, sewage or radioactive waste handling, and underground cable passage.

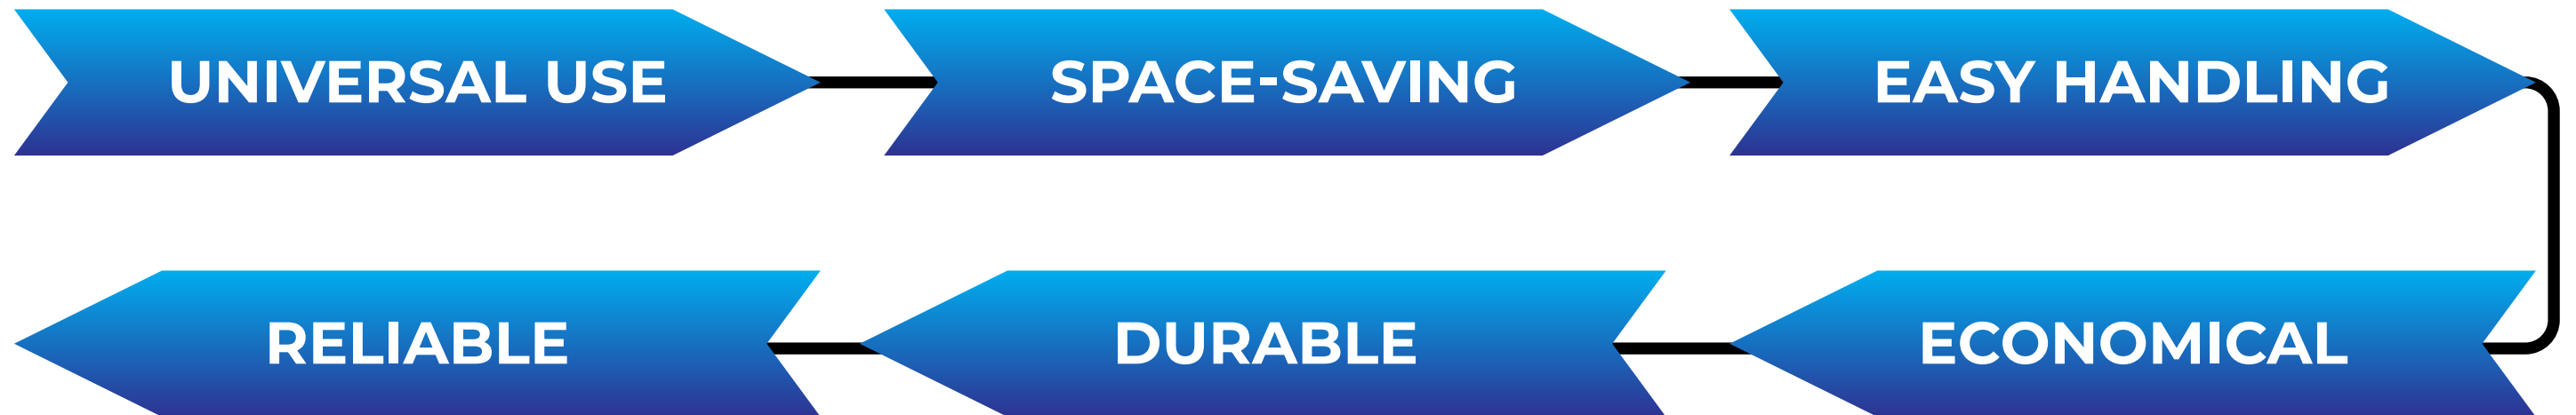

# Advantages and Features

- Increased dependability
- Resistances to reduced temperature
- Increased resistance result
- Wear-resistant
- Exquisite flow quality
- Exquisite chemical resistance
- Exceptional binding quality
- Outstanding UV resistance
