Learn how to restart discord on mac and windows

Discord is a popular communication app that allows users to chat, and share media online. However, Discord can sometimes experience technical issues or glitches that may require a restart. Restarting the app can fix many issues, including freezing, crashing, and problems with voice chat. In this article, we'll walk you through about **how to restart discord** on your device, including Windows and Mac.

How to Restart Discord on Windows ?

If you're using Discord on a Windows computer, there are several ways to learn regarding **how to restart discord**. The easiest and most common way to fix any minor issues with the app is to close it and reopen it.

Step 1: Close the Discord App

To close the Discord app on Windows, follow these steps:

1. Right-click the taskbar's Discord symbol.
2. Click "Close window."

Alternatively, you can close Discord by clicking the "X" button in the top right corner of the app window.

Step 2: Restart the Discord App

Once you've closed Discord, you can restart the app by following these steps:

1. Click on the Discord icon on your desktop or in the Start menu to reopen the app.
2. If the app doesn't reopen, try restarting your device and then reopening the app.

If closing and reopening Discord doesn't fix the issue, you can try ending the Discord task in the Task Manager.

Step 3: End the Discord Task

To end the Discord task on Windows, follow these steps:

1. To launch the Task Manager, simultaneously press the "Ctrl," "Shift," and "Esc" keys.
2. Click on the "Processes" tab.
3. Look for the "Discord" process.
4. End task by selecting the "Discord" procedure with a right-click.
5. Restart the program after a couple of seconds.

If you're still experiencing issues with Discord, you can try clearing the app's cache.

Step 4: Clear the Discord Cache

Many problems can be resolved by clearing the cache. To delete the cache on Windows, follow these steps:

1. Close the Discord app.
2. To launch the Run dialog box, press the "Windows" key and the "R" key simultaneously.
3. Type "%appdata%\discord" (without quotes) and press "Enter."
4. Delete all the files and folders in the Discord folder.
5. Restart the app.

How to Restart Discord on Mac ?

If you're using Discord on a Mac, you can also talk about the many possible ways of **how to restart discord**. The easiest way is to close the app and reopen it.

Step 1: Close the Discord App

To close the Discord app on Mac, follow these steps:

1. Go to the Dock and select the Discord symbol.
2. Click the "X" button in the top left corner of the app window.

Alternatively, you can close Discord by clicking "Discord" in the top menu bar, then clicking "Quit Discord."

Step 2: Restart the Discord App

Once you've closed Discord, you can restart the app by following these steps:

1. Click on the Discord icon in the Dock to reopen the app.
2. If the app doesn't reopen, try restarting your device and then reopening the app.

If closing and reopening Discord doesn't fix the issue, you can try clearing the app's cache.

Step 3: Clear the Discord Cache

Clearing the cache can fix many issues, especially if you're having trouble with voice chat or media sharing and want to know **how to restart discord**. To delete the cache on a Mac, follow these steps:

1. Close the Discord app.
2. Open Finder and click on "Go" in the top menu bar.
3. Click on "Go to Folder."
4. Click "Go" after typing "/Library/Application Support" (without the quotations).
5. Find the "Discord" folder and delete it.
6. Restart the app.
